The Draft Tests

The NCA Draft Tests are a series of exercises designed to develop and demonstrate the innate ability of purebred Newfoundland dogs in a land-work capacity involving hauling. Historically, the Newfoundland has functioned as a draft dog in various capacities, and performance of these exercises is intended to demonstrate skills resulting from both natural ability and training that are applicable to realistic work situations. Dogs must be willing to work with their handlers and the exercises must be accomplished efficiently. The goal of each handler is to maintain control while encouraging his/her dog's natural independence; together, they demonstrate teamwork. Since a dog can perform draft work only in cooperation with a person, each handler must demonstrate an understanding of draft work with the dog's ability, training, and equipment.
